FOREWORD

For the second year in a row Massachusetts manufacturers have posted strong export sales that have surpassed the national export average. Exports from Massachusetts grew by 7.65 percent in 1996 compared to a national average of 6.82 percent. Although not as strong as last year's extraordinary export sales increases of 15.31 percent for the state and 13.78 percent for the nation, this year's numbers still represent strong, stable growth. Indeed, this is the third consecutive year that the state has posted export sales growth of more than seven percent.

As in the past the three dominant export sectors for the state were (1) industrial machinery and computer equipment, (2) electronic and electrical equipment, and (3) instruments and related products.

Taking a look at our top 10 export markets, Asia increased in importance this year. Japan, Korea, Taiwan, and Singapore all advanced in their trade ranking position vis a vis Massachusetts. Singapore replaced Hong Kong as the fourth Asian market among our top 10 export destinations.

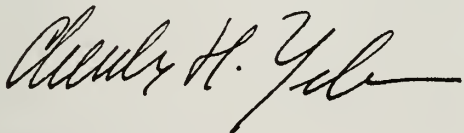

Export sales to Mexico also showed exceptional strength this year advancing by more than 40 percent as that country continues recovering from its economic crisis of two years ago. Among our traditional European trading partners, Belgium and Switzerland were the fastest growing markets for Massachusetts products in 1996. Export sales to these countries rose 43.55 percent and 96.80 percent, respectively.

Missing from the report are numbers pertaining to Massachusetts export of services. Unfortunately, this important component of the Commonwealth's economy is not tracked at a state level. Considering the strength of the Massachusetts service sector in engineering, finance, law, medicine and education, this data, if available, would certainly present an even healthier picture of the state's export performance.

At the end of this book figures are also shown for exports and imports through the Boston Customs District. (Boston's district includes ports and airports in Connecticut as well as Massachusetts, but the bulk of trade is from Logan International Airport and the Port of Boston.) Reflecting the high technology nature of the region's economy, more than 85 percent of the state's exports through the custom district move by air rather than sea.

We hope this collection of data will help you target new areas of export opportunity. Massport's airport and seaport are your transportation links to the world and its markets. Our International Marketing Department stands ready to put its staff to work in Boston and seven overseas representative locations (UK, Germany, Mexico, Singapore, China, Israel, and Brazil) to help you find and qualify new international business partners.

As always, Massport extends its thanks to the Massachusetts Institute for Social and Economic Research (MISER) which assembled this document.

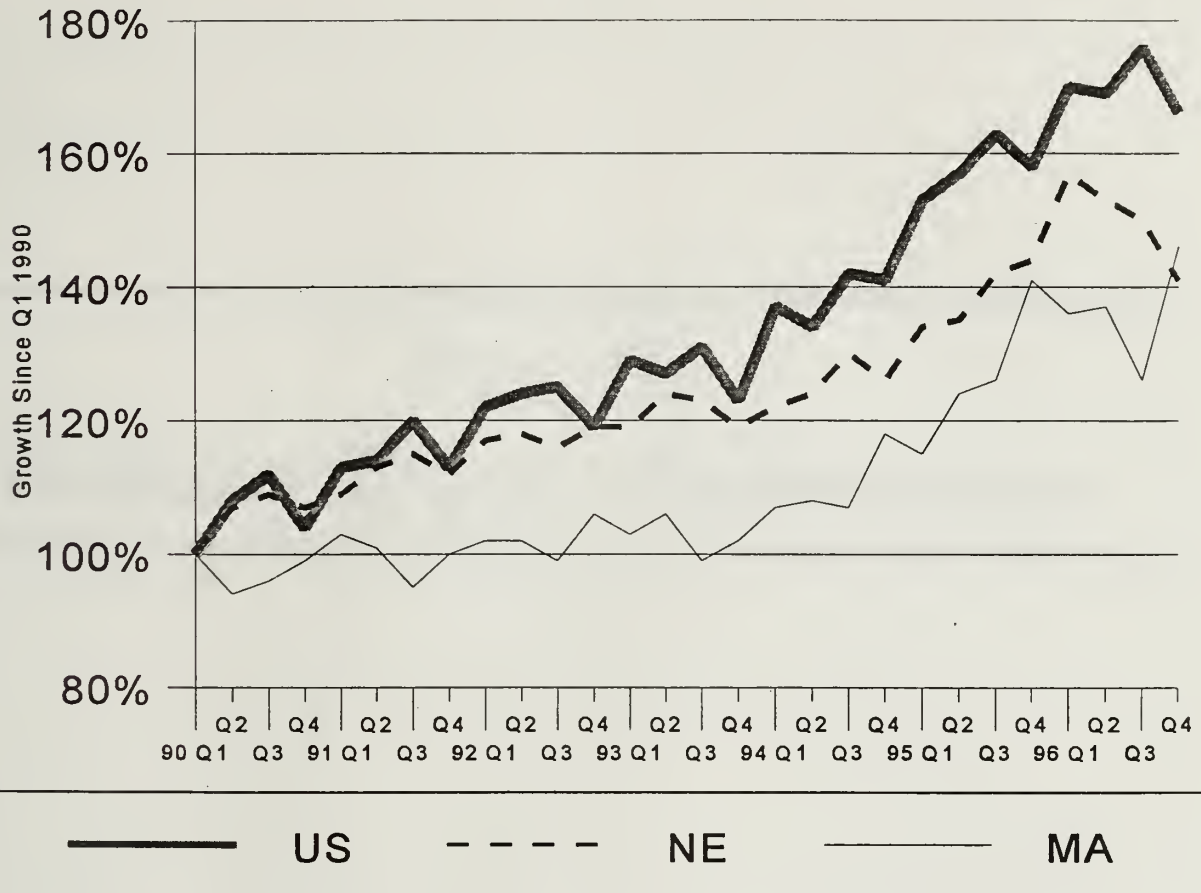

Charles H. Yelen
Managing Director, International Marketing

MA Exports of SIC 35

Massachusetts exports of industrial machinery and computer equipment have remained fairly steady over the measured period. Despite a dip to \$3.9 billion in 1993, exports have risen gradually since then to over \$4.6 billion in 1996.

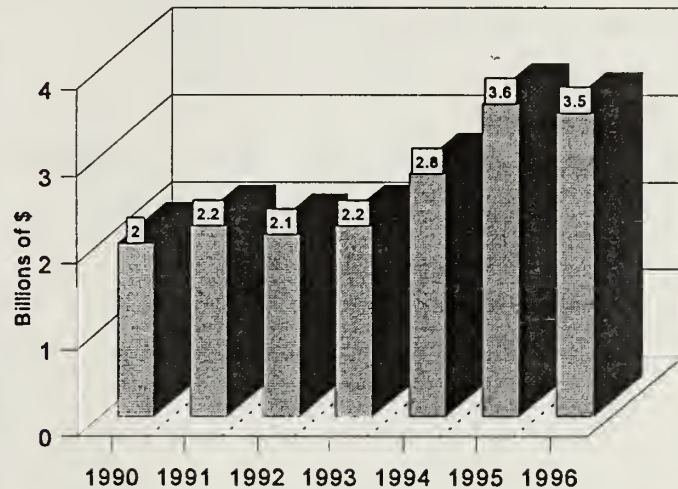

Exports to the Far Eastern nations of Japan, the Republic of Korea, and Taiwan showed the highest levels of growth. While falling slightly, export levels to Canada continued to be the highest of any country.

SIC 36

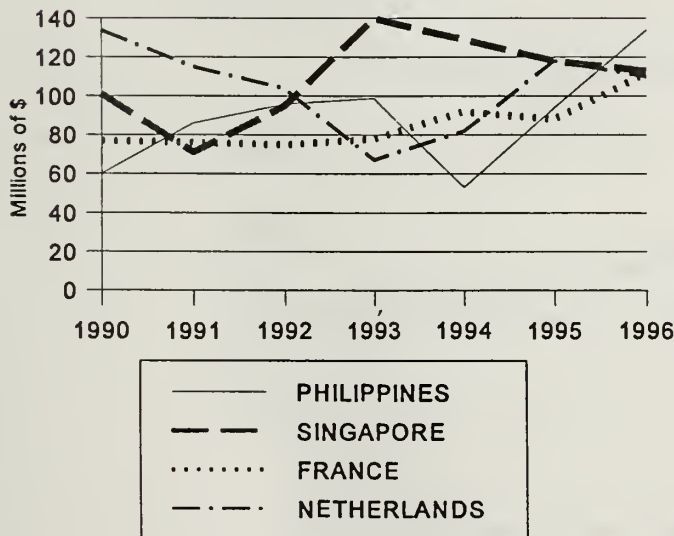

MA Exports of SIC 36

MA Exports of SIC 36

MA Exports of SIC 36

Exports of SIC 36 declined slightly in 1996 to \$3.5 billion, much of which can be attributed to shortfalls in the Canadian and English markets.

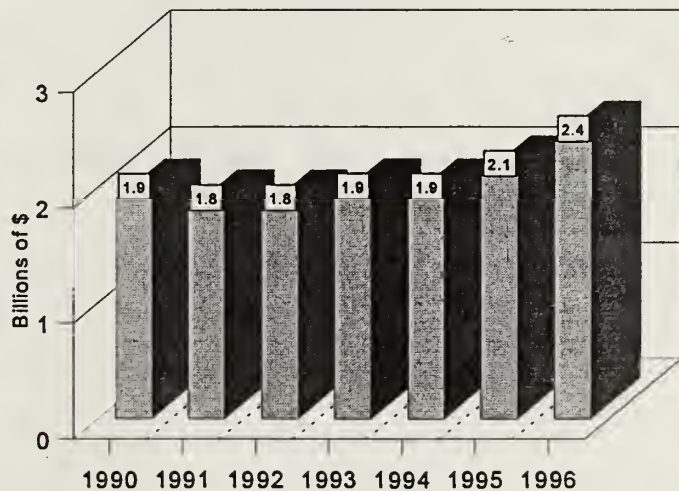

Exports to Germany have rebounded significantly since a period low in 1993. In 1996, Germany overtook Taiwan as the fourth largest destination country for electronics and electronic equipment exports.

1996 was an excellent year for exports of instruments and related products, in which total shipments increased to seven of the top ten markets.

The top three markets, Japan, the UK, and Germany, have all remained very steady over the measured period, and all have seen increases over the last two years.

Belgium and Taiwan grew the fastest between 1995 and 1996, with growth rates of 312% and 114%, respectively.

MA Exports of SIC 37

1996 was a banner year for Massachusetts exports of transportation equipment, as total shipments more than doubled in value since 1994. Nearly all of this phenomenal increase, however, can be attributed to two markets - Finland (530% over 1995) and Switzerland (2833%).

Other historically large markets, such as Spain and Canada, remained very steady, while others, such as the UK and Sweden, declined significantly.

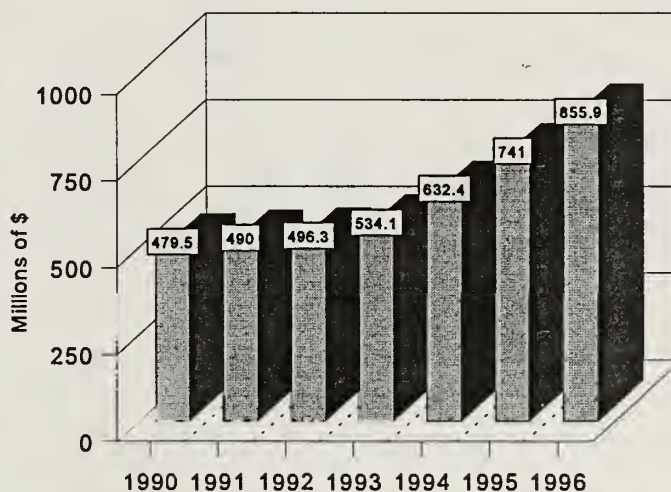

SIC 28: Chemicals & Allied Products

Chemicals and Allied Products has proven to be one of the state's most steadily growing export industries, as total shipments have increased every year over the measured period.

Seven of the top ten destinations have all posted strong rates of growth, led (in terms of volume) by Canada (14.3%), the UK (15.1%) and Mexico (41.3%). Also of note, Brazil has emerged as a rapidly growing market, as exports to that country surged between 1995 and 1996 by 54%.

MA Exports of SIC 34

Massachusetts exports of fabricated metal products neared the \$800 million mark in 1996, an increase of \$180 million over 1995. The top eight export destinations all posted strong rates of growth.

After replacing Germany as the top destination in 1994, the Canadian marketplace for Massachusetts fabricated metal products continues to grow rapidly (28% between 1995 and 1996).

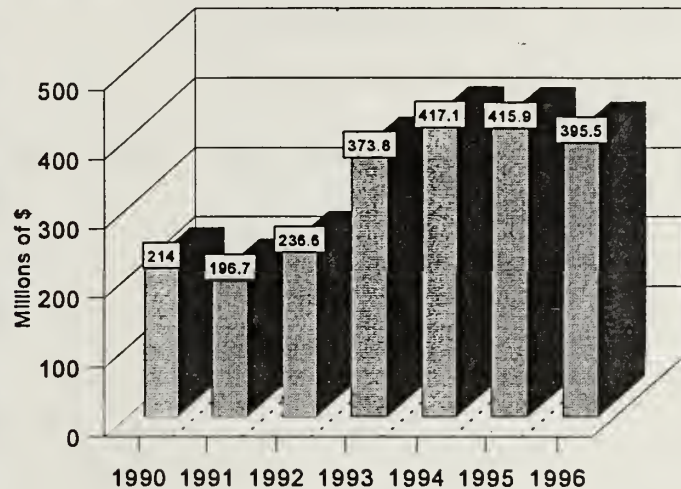

Also of note, Taiwan (1163%), Japan (125%) and the Netherlands (194%) all showed rapid growth as export destinations between 1995 and 1996.

SIC 30: Rubber & Misc. Plastics Products

MA Exports of SIC 30

MA Exports of SIC 30

After outpacing US export growth since 1993, Massachusetts' overall export growth of Rubber and Miscellaneous Plastics Products slowed slightly in 1996. Since 1994, total shipments have gradually declined and amounted to \$396 million in 1996.

Much of this phenomenon can be attributed to a drop-off in exports to the Netherlands. At the same time, however, other major markets have grown steadily over the measured period, and new surges in shipments to the Dominican Republic and Belgium have helped to offset some of the loss.

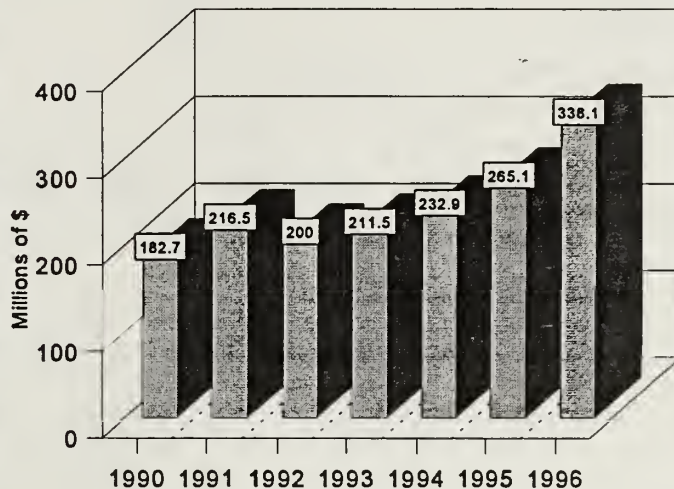

SIC 33: Primary Metal Industries

Top 10 Markets:

Primary Metals continues to be one of the state's fastest growing traditional export industries. Since 1992, exports of SIC 33 have risen every year to over \$338 million in 1996. In addition, state export growth exceeded US levels for the first time in the measured period.

In 1996, Japan overtook Canada as the top export destination due to a 100% surge. Also of note, exports to Switzerland skyrocketed 149% between 1995 and 1996.
